

Data Security

Data Security and Email Vulnerabilities

Click here to view the webinar on Data Security: What You Need to Know, Now! - Hosted on May 11th, 2016
Download Presentation Slides In the regulatory world, there isn't much of a distinction between "recommendations" and "requirements." So CFPB-regulated entities, which include non-banks as well as depository institutions, are going to be asking all of their service providers about the policies and procedures they have in place to protect the non-public information (NPI) they collect from consumers. Mortgage lenders and mortgage brokers are going to insist that the title insurance agents with whom they do business comply and document their compliance with the CFPB's data security regulations. This webinar entitled Data Security: What You Need to Know, Now! hosted by Rick Diamond, Vice President - Agency Technology for Fidelity National Financial will answer the 20 questions your lenders will be asking about your data security policies, and share some stories that will make you sit up and take notice of this timely and critical topic. This is one webinar you cannot afford to miss!

Newsletters and Additional Materials Data Security - What You Need to Know, Now UPDATE and ALERT! Protecting Non-Public Information: A Guide for Attorneys, Title Agents and Realtors® FNF and DOJ Cyber Incident Preparedness Checklist Resources Email Encryption We have a great deal with a company called Zix who are an industry leader in easy-to-use encryption, with nearly 15,000 business customers.
